Silhouette®

ICONIC EYEWEAR MADE IN AUSTRIA. SINCE 1964.

THE REVOLUTIONARY
HIGH-TECH POLYMER
THAT PROVIDES A UNIQUE
WEARING COMFORT

SPX®+

The top half of the advertisement features a collage of images. On the left, there's a close-up of many small, clear, faceted crystals or lenses. On the right, there's a close-up of a metallic, possibly titanium, surface with a fine, textured pattern. The Silhouette logo is centered at the top, with the tagline 'ICONIC EYEWEAR MADE IN AUSTRIA. SINCE 1964.' below it. Below the collage, on the left, is a small image of a red Silhouette SPX+ frame being tested on a machine with a bright light. On the right is a large, clear image of a pair of Silhouette SPX+ sunglasses with a metallic frame and dark lenses.

Silhouette®

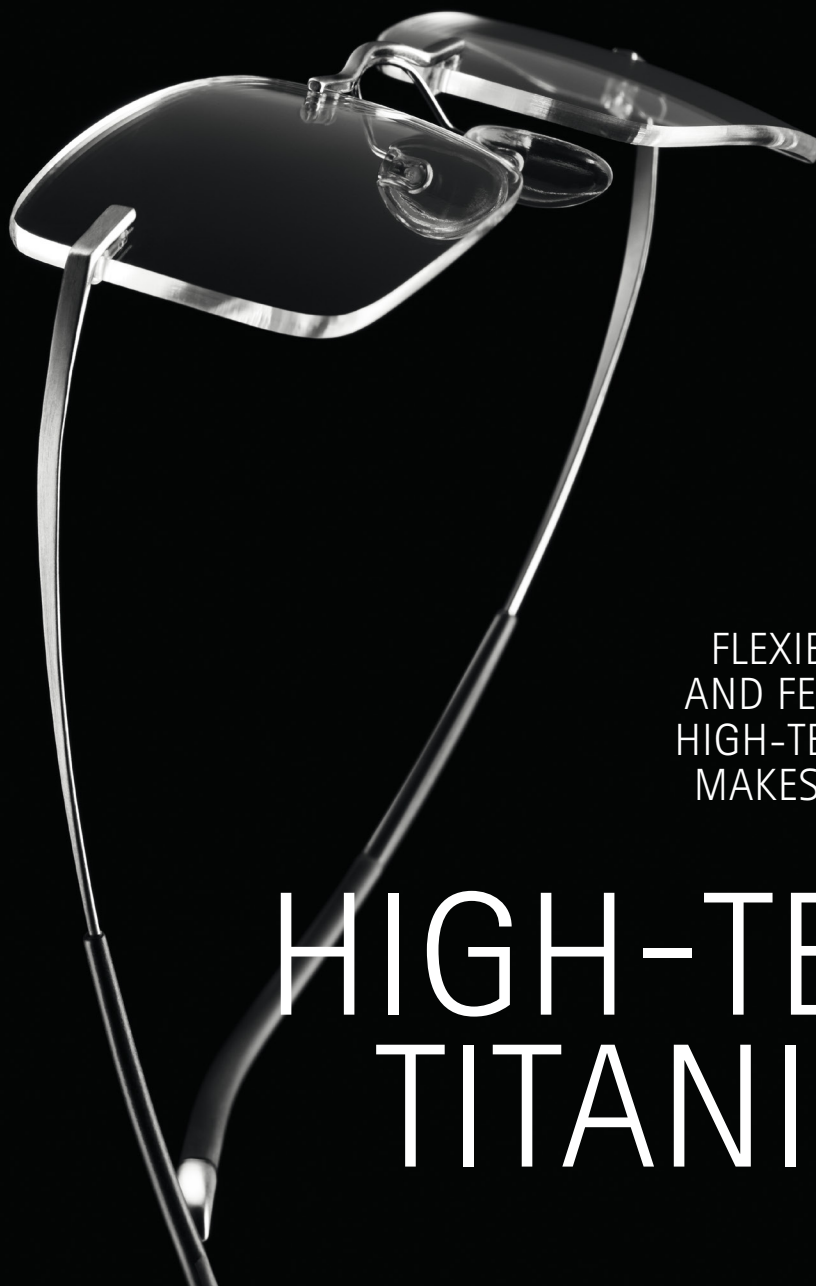

ICONIC EYEWEAR MADE IN AUSTRIA. SINCE 1964.

THE INNOVATIVE QUALITIES OF SILHOUETTE'S SPX®+

- 1 OUTSTANDING LIGHTNESS:** SPX®+ provides unparalleled **lightness** through a minimal design that is crafted for maximum **comfort**.
- 2 SUPERIOR FLEXIBILITY:** SPX®+ is twice as **strong** as acetate, while being **lighter** and **more flexible**, allowing for extremely thin eyewear designs that are **high stability** and **adjustability**.
- 3 AESTHETIC DESIGN:** SPX®+ provides extensive **minimalist design** possibilities without sacrificing function, due to its flexibility and strength.
- 4 HYPOALLERGENIC:** SPX®+ provides the **utmost comfort** and is perfect for those with sensitive skin. It is also **resistant to cosmetics** and **sweat**.
- 5 SHAPE STABILITY:** SPX®+ retains stability – even at high temperatures. It **keeps its shape** to optical integrity through a **perfect fit**.
- 6 DURABLE SURFACE BRILLIANCE:** SPX®+ is **UV-stable**, with long-lasting **color brilliance**. It allows for fascinating colors on **scratch-resistant** transparent or opaque surfaces.

Silhouette[®]

ICONIC EYEWEAR MADE IN AUSTRIA. SINCE 1964.

FLEXIBLE, DURABLE,
AND FEATHER-LIGHT:
HIGH-TECH TITANIUM
MAKES MINIMALISM
A REALITY

HIGH-TECH
TITANIUM

Silhouette®

ICONIC EYEWEAR MADE IN AUSTRIA. SINCE 1964.

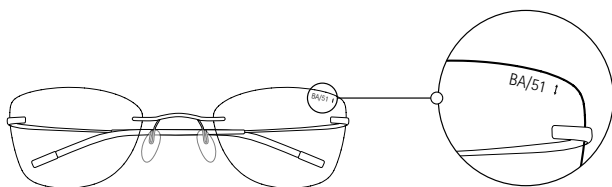

SILHOUETTE'S HIGH-TECH TITANIUM LEADING QUALITIES

- 1 OUTSTANDING LIGHTNESS:** High-Tech Titanium is **light as a feather**, offering unparalleled **wearing comfort**.
- 2 AESTHETIC DESIGN:** High-Tech Titanium is the foundation for Silhouette's minimalist, **screwless** design — a harmony of form and function.
- 3 SHAPE STABILITY:** High-Tech Titanium is **thermo-resistant**, always **keeping its shape** and maintaining **optical integrity**.
- 4 HYPOALLERGENIC:** High-Tech Titanium provides the **utmost comfort** and is perfect for those with sensitive skin.
- 5 SUPERIOR FLEXIBILITY:** High-Tech Titanium is **flexible** and **strong**, allowing for a **solid design**, while providing a perfect fit without tension.
- 6 DURABLE SURFACE BRILLIANCE:** High-Tech Titanium eyewear is **resistant to cosmetics, corrosion** and **UV rays**. From its frame to its finish, its colors are designed to last.

EXISTING ITEM NUMBERING

2016 AND BEFORE

EXAMPLE: DEMO MODEL

EXAMPLE: CHASSIS

As of January 2017, Silhouette introduced a new item numbering system. All collections released on or after January 1st, 2017 will utilize the new system. Collections that released prior to this date will continue to use the numbering system they released with.

Regardless of release date, all Silhouette rimless collections contain demo and chassis frames. For your convenience, the right temple of both demo and chassis frames feature the number system for that item.

Demos are intended to be used as demonstration models that remain on Silhouette collection trays. This ensures that patients always have a full assortment of options to choose from and customize. Each demo frame features a specific lens shape, frame color, and size.

When a patient has selected their perfect frame from your demo assortment, a Silhouette chassis can be ordered in any available color, size, and style. The chassis allows you to customize the fit and style of the frame to perfectly meet the needs of your patient. It also reduces costs, while keeping your display fully stocked. This allows for optimal selection and inventory management.

Silhouette rimless collections also feature clip-ons and lens patterns that are available in different eye sizes, for most lens shapes.

INSPIRE (MODEL 5506) COLLECTION LENS TINTING

Tinting lenses is part **science** and part **art**.

The **science** of tinting is affected by:

- The lens material being tinted – does the material absorb the color?
- The hard coating used on the lens – does the hard coat absorb the color?
- The temperature of the tint bath
- The age of the tint bath
- Will the lens be AR coated after tinting?

The **art** of tinting is knowing how to create a desired color using the palette of colors available to the tint technician:

- Most ECPs and labs who tint lenses will have a selection of 6 to 9 colors
- These colors are used alone or in combination to create a multitude of lens tint colors
- Knowing how colors interact is the “art” of lens tinting, so the technician needs to understand this process as well as the science of tinting

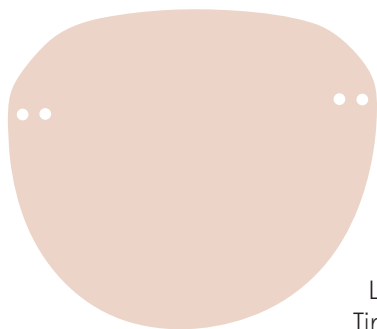

The Inspire tint samples were sent to Brain Power Incorporated (BPI) in Florida (www.callbpi.com) who specializes in ophthalmic lens tinting. They matched our samples to their color palette and reported the following:

Inspire Lens Shape	Demo Frame Color/Finish Code	Silhouette Tint Description	Corresponding BPI Tint	BPI Part Number
DP	6565	Brown	AO Pearl™	29100
DO	7005	Grey	BPI Gris™	29200
DM	5545	Mint	BPI Breath of Blue	31800
DL	3635	Rosé	BPI AO Crux-Lite™	20500

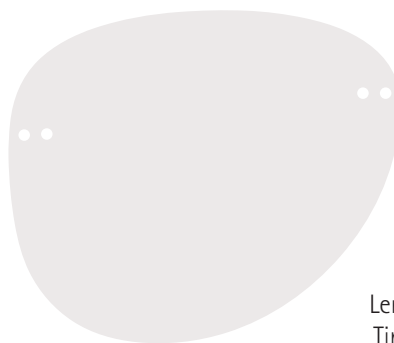

This is a reference to provide a starting point for duplicating the tint colors of the Inspire Collection. As stated above, there are variables that will affect the tinting process and ECPs should work with their lab partners to ensure successful tint density and tint color matching.

This is especially true with lenses that will have anti-reflective treatments added after the lens has been tinted for color. Wholesale labs that apply anti-reflective coatings to tinted lenses will have processes in place to ensure a close match.

GROOVED GLAZING

APERTURE. ACCENT RINGS / Mod. 5550

Milling of optical lenses with nylon-groove

Groove-depth:	0.7 mm
Groove-width:	0.8 mm
Basis curve frame:	5
Basis curve lens:	4-6
Minimum thickness of lens rim:	1.8 - 2.0 mm

Transfer shape only via formers or OMA-files!

ATTENTION: due to minimalist diameters of front frame do not heat under any circumstances!

Insert lens from behind!

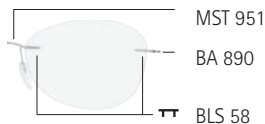

Note: mounting from the front could crack the lens

Milling of optical lenses with nylon-groove

Groove-depth:	0.55 mm
Groove-width:	0.7 mm
Basis curve frame:	5B
Basis curve lens:	4-6 B
Minimum thickness of lens rim:	1.8 - 2.0 mm

Transfer shape only via formers or OMA-files!

ATTENTION: due to minimalist diameters of front frame do not heat under any circumstances!

Insert lens from behind!
Note: mounting from the front could crack the lens
