

Silhouette

TECHNICAL INFORMATION

Temple Inclination

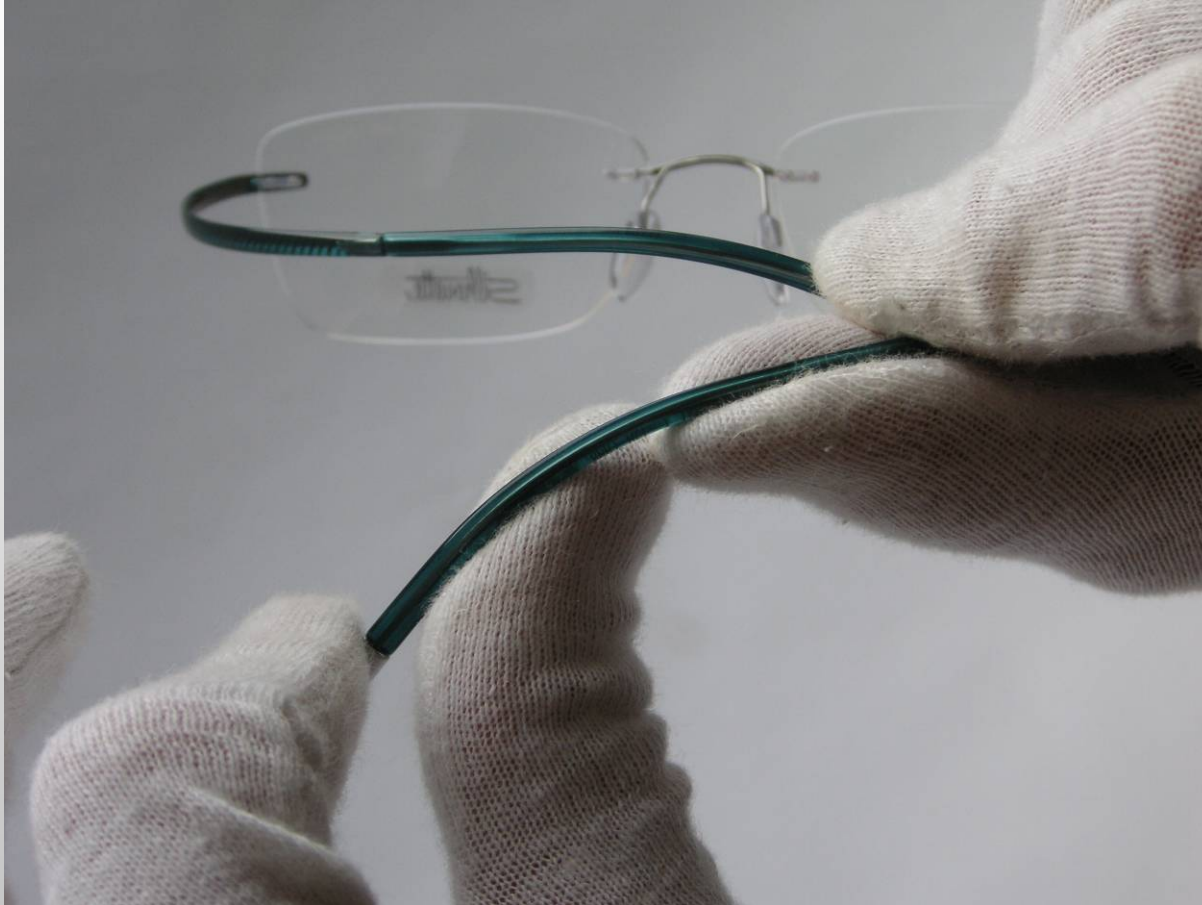

Warm up temple carefully with an air heater for a few seconds at approx. 80°C / 176°F (until there is no tension).

NOTE: Be careful not to overheat SPX parts or RX lens. Protect both against heat with a leather cloth.

Once SPX is soft, adjust the inclination and keep position at room temperature until temples cool² down.

Temple Curving

Curve temple end in large movements.
Do not heat or fold.
