

Special Notes on Glazing Silhouette Nylon Frames:

For optimal quality, high index 1.60 or better lenses should be used.

A safety bevel is recommended to prevent lens chipping and damage when mounting the frame.

Lens groove depth should be between 0.5mm and 0.6mm

Lens groove width should be between 0.5mm and 0.6mm

For the best mounting, please use the nylon cable supplied with the frame for installation. It is also available in 1000mm length as "NY 2" Part #:
