

## Hints to Solve Glazing Difficulties For Help Call 866-315-1929

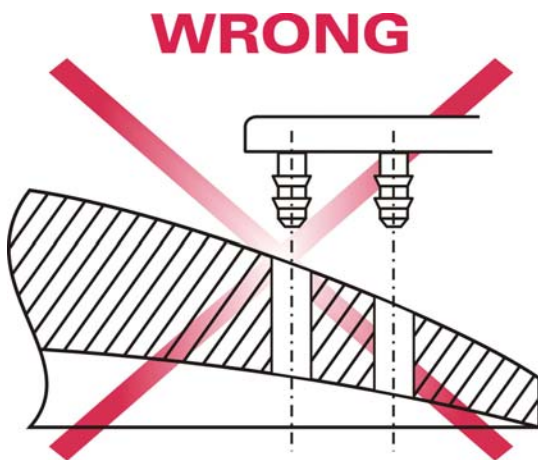

The most common concerns working with the Silhouette Rimless System are due to these 3 areas:

After you mark the pattern lines on the lens, **RE-CHECK** the pattern marks, the 180 line and the shape so that they all align perfectly.

Make sure the sleeves are cut perfectly flush with the lens. Open the holes after cutting with a push-pin.

3.

The holes you have drilled **must** be at 90 degrees to the front surface. If you use the drill gauge guide, it will assure that this happens.
