

Silhouette®

1. Holding the clip at the bridge, press the clip onto the bridge of the frame. It will snap into place at the bridge only.

2. Hold the eyewear and the clip at the bridge

3. Lift the clip away from the lens and adjust into place so that the bridge and end pieces are covered.

4. It will then be in the proper position on the frame. The bridge will fit into the slot on the clip.

5. To remove the bridge. Hold the frame at the bridge, lift one side of the clip away from the lens and rotate upwards. Clip will lift off.
