Exchanging Hinge Cylinder

Temple Disassembly

1. Hold lens fixation firmly with mounting pliers.
2. Open temple completely.
3. Press temple out of titanium side part with small movements.

Greasing Hinge with Teflon

After cleaning grease inside loop of hinge with Teflon High Precision Lubricant (P 0030) and mount temple.

Temple Assembly

Temple Adjustment

- Curve temple in large movements. Metal inside temple enables cold adjustment of temple ends.
- Never overbend temple ends.

Temple End Disassembly

1-3. Loosen super glue inside temple ends using pliers with plastic side parts.

4. Pull off temple end with small rotating movements.

Temple End Assembly

1. Apply a small amount of Loctite on the inside of the metal inlay.
2. Lift temple end and slowly pull upwards so the glue does not come off.
3. Remove excess glue immediately with ethanol.
